MONTANA Slates

A natural looking slate with all the benefits of fibre cement

Montana slates have a textured surface with dressed edges that recreates the appearance of traditional natural slate. This traditional looking slate is available in an attractive Blue-black and Welsh blue, a colour which is similar in appearance to the famous 'Bangor Blue' slates from Wales.

Montana slates have been successfully used on many private houses and developments throughout the UK over the last 25 years, proving popular with clients and architects alike.

Montana slates have a multi layer acrylic based coating their edges and their surface which highly counteracts the growth of moss. The slates have a nominal thickness of 4.2 mm. Montana slates achieve the highest class, class B in accordance with EN 492.

They have a 30 year structural guarantee and a 10 year colour guarantee!

Montana Slates Technical details:

SIZE	600 x 300 mm*
SURFACE	Textured
EDGES	Dressed
NUMBER (pcs per pallet)	1,080
WEIGHT (Kg per 100pcs)	153kg
MINIMAL DENSITY	$\rho \geq 1700 \text{ kg/m}^3$
WATER ABSORPTION	< 4 %
STRENGTH	Class B – 70 NM/m
RIDGES	90°, 105°, 120°, 135°

ROOF PITCH

Moderate exposure (< 56,5 l/m² per spell - rafter length ≤ 9 m): standard roof pitch 25°

- Headlap: 100 mm
- Batten gauge: 250 mm
- Battens: 4 m/m²
- Slates: ± 13.16 pcs./m²
- Weight (laid): ± 20.13 kg/m²

* Double sizes also available
